DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Kashiwagi et al, US Patnet 6,239,044 B1.

Kashiwagi et al teaches an apparatus for forming a silicon oxide layer on a plurality of substrates 50 that includes: a reaction vessel that defines reaction chamber 10; a reaction chamber heating unit 14 that surrounds the reaction chamber; and a process gas supply unit that supplies a compound gas containing hydrogen and chlorine (HCl) 33 and oxygen gas 32 to a gas heating unit 30 to produce water by combustion.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kashiwagi et al in view of Toya et al, US Patent 6,516,143 B2.

Kashiwagi et al was discussed above.

Kashiwagi et al differs from the present invention in that Kashiwagi et al does not teach that the gas heating unit comprises a heating vessel defining a heating chamber packed with flow impeding members, and a carbon resistance heating member with a quartz cover sealing the resistance heating member surrounding the heating chamber.

Toya et al teaches a gas heating unit 1 comprising a heating vessel 2 defining a heating chamber packed with flow impeding members 12(12a-12d), and a carbon resistance heating member 10 with a quartz cover 11 sealing the resistance heating member surrounding the heating chamber. (Figures 1-5, column 7 lines 38-67)

The motivation for replacing the generic gas heated taught by Kashiwagi et al with the gas heater of Toya et al is to provide a specific gas heater as required, but only generically described by Kashiwagi et al, and to improve durability, suppress particle and metallic contamination, and to reduce the size of the gas heater as taught by Toya et al (column 2 lines 40-45)

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to replace the generic gas heater of Kashiwagi et al with the gas heater of Toya et al.

6. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Response to Arguments

7. Applicant's arguments with respect to claims 13-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art teaches the technological background of the invention.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
